YUDD'S TOGGERY

26 W. 9th St.

Not Quite Down and Out.

Many a man feels that he is down and out when as a matter of fact he still has in him many years of good service that can be brought out by proper treatment. Stomach trouble often makes one despondent. It hits him where he lives, saps his strength and energy and makes him feel like giving up. Give him a few doses of Chamberlain's Tablets to improve his digestion and invigorate his liver and bowels, and in most cases recovery is prompt and effectual.—(Adv.)

LARRY DOYLE AS BALANCE WHEEL SHOULD BE BIG HELP TO THE GIANTS IN PENNANT RACE

A change from one city to another often has a great effect on a ballplayer's play. The influence brought to bear by the manager, the associates on the club very often will show their effect on the player's form.

It is on these possible influences that John McGraw is counting in his recent trade which brings Larry Doyle back to the Giants.

A few years ago Doyle was among the greatest infielders in the game. One year he led the National league in batting. On another year he was one of the leading sluggers of the organization. During this time his mechanical play in the field was superb.

Doyle began to go back after an accident which kept him out of the game for the greater part of a season and since McGraw traded him to Chicago for Heinie Zimmerman, a couple of seasons ago, his play has not been what was expected of him.

McGraw needs a veteran second baseman to take the place of the temperamental Herzog. A player of the Doyle type would help balance an infield made up of Zimmerman and the fiery Fletcher.

And Doyle should play better ball for McGraw than he was able to play for the Cubs. Doyle was not satisfied in Chicago and that undoubtedly had a great deal to do with the character of his play.

McGraw is evidently counting on this and hopes Doyle will be able to come back with his big war club and win the league again in the batting department.

LARRY DOYLE

HE HAD PROOF AND NEEDED A LAWYER

Unique Letter Received by Lawyer but He Didn't Even Nibble.

Attorney L. D. Miller is in receipt of a letter from a husband in upper East Tennessee who is anxious to sever the ties that bind, but unhappily so, him and his wife. The letter is interesting for its uniqueness. It is as follows:

"Dear Sirs:—I have a case that I would like for you all to take, if you think that you can make a success. I will give you the case. The case will be like this, a non-residence & also will have to be worked awfully sly, if the woman was to here of the case she would interfere."

"So please advise me on the case in return mail."

"Also the fees at old also when chancery court will be or when the case could be hard & if you can get the chancery clerk & master to hear the case & get the judge to affirm the decision."

"I can also produce the proof that the woman is a loud woman, which of the other two charges that would prefer also for the attempt of life or in other words she told me if I ever did live with her any more that she would kill me."

"I can establish any proof that is necessary in the case, don't weary about the proof."

"I do not know where the woman is now I have not lived with her in five years."

"Let me hear from you at once & when you can set the case before the court."

"Yours as ever."

TO SELECT CHANCELLOR BY GENERAL CONVENTION

(Special to The News.)

Sequatchie, Jan. 14.—At a recent meeting of the democratic committee of the Twelfth chancery division, it was decided to hold county conventions on Monday, Feb. 4, to instruct delegates to a general convention to be held at South Pittsburg, Friday, Feb. 16.

Hon. Clem J. Jones, of McMinn county, has announced as a candidate, and Hon. Joseph L. Ewell, of Coffee county, and Hon. F. L. Stewart, of Franklin county, are said to be candidates also for the office, thus making it a three-cornered fight.

To Prevent the Grip. Colds cause grip—LAXATIVE BROMO QUININE Tablets remove the cause. There is only one "Bromo Quinine." E. W. GROVES' signature on box. 20c.—(Adv.)

TO SELECT CHANCELLOR BY GENERAL CONVENTION

(Special to The News.)

Sequatchie, Jan. 14.—The thermometer at the store of M. D. Brewer, this city, recorded 3 degrees below zero, the lowest reading Saturday morning. Other thermometers in less exposed position read three above zero at 4 a.m. falling the day to 10 above and rising during the day to 16 above.

Very violent wind accompanied the blizzard during the night, rocking the houses of some of the inhabitants.

CITIZENS CONFISCATE CARLOAD OF COAL

(Special to The News.)

Scottsboro, Ala., Jan. 14.—The coal situation at Stevenson has become so acute the citizens of the town confiscated a car Saturday that was passing through and distributed it among those that were entirely out.

The coldest weather in fourteen years was experienced in Scottsboro Saturday morning, the thermometer dropping to 3 degrees below zero.

BASEBALL AS IT WAS TWENTY-TWO YEARS AGO

New York, Jan. 14.—A glimpse of the baseball of the early '70s is given in a pamphlet on the game published in 1875 which was recently unearthed by a modern devotee of the sport. The booklet, which is equivalent to the present-day baseball guide, consists of about thirty pages instead of the several hundred now necessary to chronicle the records of the many major and minor league teams.

Much of the space is devoted to the doings of the Boston National Association club, winner of the championship of the previous year. The combination included several players the names of whom are still familiar to the fans of this day.

That they were high-class players, according to the standards of those times, goes without saying, yet there is nothing to indicate that they were supermen either on the diamond or off the field of play.

The personnel of the Boston club of that year shows that of the twelve players whose physical dimensions are given A. G. Spalding, pitcher and centerfielder, was the only one who exceeded the 6-foot mark. The majority of the players ranged from 5 feet 6 inches to 5 feet 9 inches, and the average weight was not more than 160 pounds. The heaviest man on the team was McVey, who tipped the scales at 190 pounds.

The batting averages of those days were computed to show the number of basehits per game, and McMullen, of the Athletics, led the league with 1.90. "Pop" Anson was eighth with 1.73 and Spalding eleventh with 1.70. In club batting the Boston team led with an average of 17.11 hits per game, and the Athletics were second with 15.06.

The total receipts of the Boston club for the season of 1874 amounts to \$30,921.17, and the expenses \$20,865.37. A portion of these expenses, which were exceptionally large for that period of baseball development, included the trip to Europe, the first of the several invasions of England and the continent by American baseball, come saloons, the yearly roll for the entire year then would now barely pay for one star player, as the accounts show that \$17,900 covered the entire cost for the season in this direction.

Ground rent amounted to \$17.50, and uniforms, bats, balls, etc., cost \$287.83. Even in the early days of the game advertising was not overlooked, as the accounts show that \$1,619.70 was spent for advertising and printing, which was the Boston team's combined rental of the grounds and the team equipment expenses.

MANY RUNNERS IN YEAR'S \$10,000 CLASS

The prosperity of the running turf is illustrated in the list of big-money winners for the year, which shows that twenty-four horses won more than \$10,000 for their owners during 1917.

In 1916 but twelve were inside the charmed circle; 1914 saw but fifteen \$10,000 winners and there were but six in 1912.

Sun Briar, owned by W. S. Kilmer, led the list with winnings amounting to \$39,505.

The big winners of the year follow:

Horse	Amount
Sun Briar	\$39,505
Omar Khayyam	49,070
Pappy	31,011
Old Rosebud	31,720
Houliess	28,725
Westy Hogan	19,811
Escoha	18,004
Tippley White	17,403
Roamer	16,501
Cudgel	15,620
King Gorin	15,578
Jack Hare, Jr.	14,800
Liberty Loan	13,995
Colonel Fennie	13,084
Fruit Cake	12,828
Moscow	12,245
Laculitta	12,070
Opportunity	11,362
Brooke	11,326
St. Charlotte	11,085
Sunbonnet	10,675
Spur	10,325
Boots	10,250

Having noticed that a Philadelphia boxer has scored a technical knockout, we are of the opinion that a technical knockout is about the same class as an informal football team.

A Wheeling boxer has been drafted as a bricklayer in the army. The main trouble is that other bricklayers are likely to try to build a wall out of his head.

All plans have been made for the A. M. C. bowling tournament at Cincinnati. This includes among other things laying in a supply of largest-size beer growlers.

According to the latest record of Princeton students in the service, all but one member of the 1916 varsity football squad are now serving with the colors or in some allied war department. The only "P" man who has not left college is under age, and he is a member of the Princeton reserve officers' training camp.

BINGHAM-MEBANE BASEBALL SCHEDULE

Mebane, N. C., Jan. 14.—President Wilson's indorsement of school athletics under present war conditions leads to the announcement that Bingham-Mebane will continue active in school and college contests of football, basketball and baseball.

The tentative schedule for the coming season is:

March 19—Wake Forest college.
March 22—Mebane school.
March 25—Collegiate institute.
March 28—Belmont college.
March 27—Wofford college.
March 28—Furman university.
March 30—North Georgia Agricultural college.
April 2—Lenoir college.
April 3—Rutherford college.
April 6—Mars Hill college.
April 8—York Union.
April 10—Randolph-Macon.
April 11—Randolph-Macon (doubleheader).
April 20—Mebane school.
May 4—Mebane school.
Pending—University of Virginia.

The election of Garry Hermann as president of the national commission of course came as a great surprise to Ban Johnson and John Tener, who also voted for him.

Alfredo De Oro is to defend his billiard championship in Havana this winter. About the only way one can keep track of three-cushion billiard champions is by a card index system.

Having secured Al Mamaux to pitch for him next year, we expect to learn at any time that Wilbert Robinson has lost both his good nature and his broad smile.

Trapshooting continues to grow in popularity. The latest compilations show that more than 4,800 trapshooting clubs are in existence, with that number being added to steadily. The state of Pennsylvania leads all the others of the country with a total of 565. New York is second with 333; Illinois third with 309 and Iowa fourth with 254.

Catarrh Is Untouched By Atomizers and Inhalers

Disease Cannot Be Reached by Local Treatment.

What a pity that so many people follow blindly the old bellwether method of treating Catarrh, and thus postpone from day to day the time when they will be free from this annoying and disgusting complaint.

The choked-up air passages are untouched for the time being by medicated sprays and atomizers, but do they remain open? Isn't the relief only temporary? Over and over again, these accumulations gather, because the disease which causes them is being untouched by the treatment.

Cleanse the blood thoroughly of all Catarrh germs, and your Catarrh will promptly disappear. For this purpose, there is no remedy that can equal S. S. S., the reliable, purely vegetable blood remedy, that has been on the market for more than fifty years. It is sold by drug stores in all parts of the land, and if you obtain a bottle and begin treatment today, you will immediately see that you are on the right road. S. S. S. thoroughly cleanses the blood and removes from it every trace of Catarrh germs. If your case, after beginning the S. S. S. treatment, requires special instructions, write to our medical director for complete advice, which he will give you without charge. Address Swift Specific Co., 1235 Swift Laboratory, Atlanta, Ga.—(Adv.)

WHERE SERVICE COUNTS

THIS GREAT CHALMERS ENGINE MAKES GAS PERFORM AS IT NEVER HAS PERFORMED BEFORE

The only way to look upon gas is as so much power. The great trick nowadays in an engine is to get out of gas all the power there's in gas.

This current Chalmers engine comes closer, we believe, to registering 100% on this score than any engine in every way.

First, there's the "hot spot," which "cracks up," as the engineers say, the raw gas into the most minute little molecules—a wonderful "power vapor."

Then this little device heats up the vapor so that when it is ready to be touched off in the combustion chambers it is dead right to deliver the full kick that's in the gas.

A "ram's-horn" manifold plays close teamwork in passing the vapor from the "hot spot" to the cylinders. It is an extraordinary piece of engineering—one of those things on a car that almost tells its own story by the way it looks.

The result is there's well nigh no waste coming out of the exhaust. Almost every little drop has been turned into power. And a power that can be made violent or soft in the twinkling of a second.

Let us show you where the "hot spot" is located, what it looks like and see how wonderfully well it performs its mission.
